Glory SDD-1700 Reaches End of Life

February 1, 2020
Long Beach, MS

Glory Global has made the decision that it will discontinue the SDD-1700 (Single Denomination Dispenser) after 30 years on the market. Though we still have new dispensers in stock, we will discontinue offering new SDD-1700 dispensers in new production ATMs on March 31, 2020.

Triton will still offer technical support, and ATMGurus will keep parts and offer repairs for the foreseeable future on the SDD-1700. Beginning in April, 2020, we will offer refurbished SDD-1700s for purchase in new ARGO model ATMs with 13-month warranties. Pricing for these configurations will be available in March.

After much research as testing, Triton is now offering the Puloon ECDM-100-Triton as a replacement dispenser. "We are dealing with people's hard-earned money daily," says Terry Asher, executive vice president of engineering and operations. "We have installations around the world, so security is of paramount concern. As a result, Triton has written proprietary firmware for the ECDM to ensure the same high level of security that we offer with our other dispenser options."

For more information on the Puloon visit our website. If you have questions, please contact us at sales@triton.com.
